More Hams buy MFJ Antenna Tuners

than all other antenna tuners in the world!

Why? That's an age old question right there because MFJ has been dominating the antenna tuner market for fifty-two years. And it's a question that has many answers. How about Price, Features, Reliability, A one year *NoMatterWhat*™ warranty and the fact that historically it is the right choice no matter what else is out there. MFJ Antenna tuners are built to last too. Talk to your elmer, I bet he has one. And they do some many wonderful things!!! A good MFJ Antenna Tuner replaces a wattmeter, an antenna switch and a dummy load. It can even offer an artificial ground for those living above the ground floor. And they can tune up nearly anything . . . fences, ladders on fire engines, metal guttering. If you can think it, it probably is possible.
